# MS9588

Dual 8K Lightweight Tri-Mode Wireless  
Gaming Mouse

Ultra-Light  
Design

Tri-Mode  
Connectivity

Up to  
26,000 DPI\*

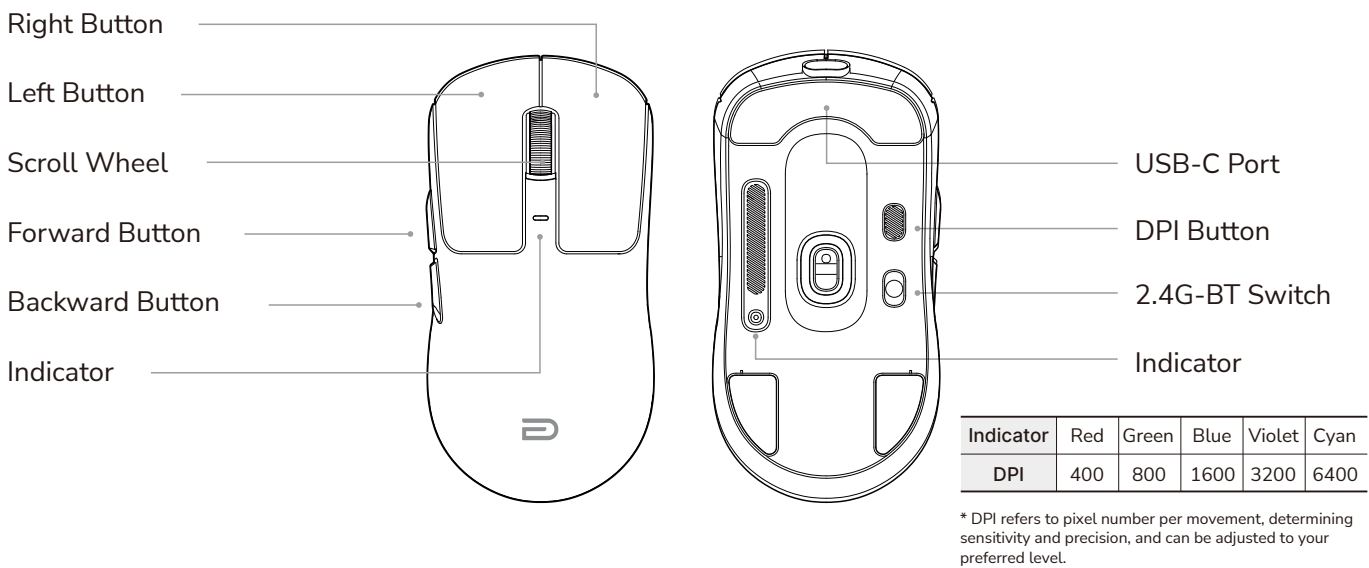

6 Programmable  
Buttons

[Datasheet](#)

\*26,000 DPI available on Windows only

# Overview

# Specifications

|                             |                                                                                        |
|-----------------------------|----------------------------------------------------------------------------------------|
| Model                       | MS9588                                                                                 |
| Connection Type             | <div><div></div>2.4G</div> <div><div></div>Bluetooth</div> <div><div></div>Wired</div> |
| Report Rate                 | 8000Hz (Max)                                                                           |
| Sensor                      | PAW3395                                                                                |
| DPI                         | 400-800-1600-3200-6400<br>(26000 available on Windows)                                 |
| Number of Buttons           | 6 (Programmable)                                                                       |
| Charging Voltage / Current  | DC 5V / ≤450mA                                                                         |
| Dimension (L * W * H)       | 123.19 x 62.39 x 39.49mm ±0.5mm                                                        |
| Weight                      | 58g                                                                                    |
| Supported Operating Systems | Windows 2000 / XP / VISTA / 7 / 8 / 10 / 11<br>macOS, Linux                            |
